MATURITY MODEL ASSESSMENT SURVEY (DOCKET #2022-WMPs)
Q01-Q04 – VEGETATION MANAGEMENT
Q05 2022 MATURITY QUESTIONS**

QUESTION 01

Considering Maturity Model Survey question E.IV.h, how would PG&E answer this modified version? Does the utility work with landowners to provide a use(s) for vegetation cut on the landowner's property? (Y/N)

ANSWER 01

Maturity Model Survey capability description and question E.IV.h. state:

- Capability Description: The utility's standards and actions for treating vegetation that has grow-in potential around lines and equipment. Higher scores are awarded for utilities that use ignition risk modeling and vegetation growth rates to determine appropriate vegetation clearances and trim cycles.
- Question: Does the utility work with local landowners to provide a cost-effective use for cutting vegetation?

PG&E works with landowners to provide them with the option for PG&E to remove vegetation waste or leave it for the landowner's use. The most common uses for vegetation that is cut is either firewood or mulch, which depends on the type of vegetation waste provided to the property owner.
