Request Date:	February 10, 2023	Requester DR No.:	CalAdvocates-PGE-2023WMP-06
Date Sent:	March 29, 2023	Requesting Party:	Public Advocates Office
DRU Index #:		Requester:	Holly Wehrman

The following questions relate to your 2023-2025 WMP submission.

If a full response to a given question will be included in your WMP submission, your response to that question of this data request may consist of a citation to the specific page(s) or table(s) of the WMP where the information may be found, a written response to the question, or both.

Topic: Vegetation Management

QUESTION 006

Please provide a list of any incidents in 2022 where the actions of a VM contractor posed a safety risk to workers and/or the public. "Safety risk" here is defined as any occurrence on a worksite where the contractor's actions created a safety hazard for either workers or the general public. For each instance, please provide:

- a) The date you were informed of the safety issue
- b) The date that the original work that created the safety issue was performed
- c) Whether the safety issue concerned a transmission or distribution circuit
- d) The vegetation management initiative involved in the original work
- e) A brief description of the safety issue involved.

ANSWER 006

Please refer to Attachment "*WMP-Discovery2023_DR_CalAdvocates_006-Q006Atch01CONF.xlsx*" for a list of all contractors involved safety incidents that took place in 2022. This data includes, but is not limited to:

- Contractor Name/ParentCo: The contractor/parent company involved in the incident.
- IncDate: The date of the incident.
- Date EN: The date the incident was formally reported and logged.
- Division: The division where the incident took place.
- Inc Types: The incident type (ie line strike)
- Incident Description: A brief description of the incident.

- Program: Description on which initiative a contractor was working on, on the date of incident.
- Corrective Action: A description of the action(s) PG&E took to prevent recurrence.

Please note, both Distribution and Transmission contractor incidents are included in the attachment. These records are pulled from the Enterprise Contractor Incident Records Tool (ECIRT) database. The ECIRT database incident recording process does not have a space for inputting Distribution or Transmission circuit information, therefore we are unable to provide that information on the spreadsheet because our system does not track the incidents that way.
