QUESTION 008

For each year from 2020 through 2023, please provide ten randomly-selected pole loading calculations performed as part of a bare-to-covered conductor replacement project. For these calculations, please provide:

- a) The full calculation input(s).
- b) The full calculation output(s).
- c) Any interpretations associated with the calculation (for example, an engineer's determination that the calculation demonstrates a pole must be replaced).

ANSWER 008

- a) - c) PG&E is providing the requested ten randomly selected pole loading calculations for covered conductor projects from 2020, 2021, and 2022. Please see attachment "*WMP-Discovery2023_DR_CalAdvocates_032-Q008Atch01CONF.zip*" for the thirty pole loading calculations provided. Each of these pole loading calculations contains the inputs, outputs, and associated information (interpretations) to identify if the pole is new or existing.

Projects constructed in 2023 are still undergoing quality verification and have not been included.
