**SUBJECT: PSPS**

The following questions related to PG&E's 2021 Wildfire Mitigation Plan (WMP) Update.

**QUESTION 03**

P. 86 of PG&E's 2021 WMP states,

“As well as expanding the PSPS Scope beyond the HFTD Map, PG&E is considering the removal of areas that are within the HFTD from PSPS scope and may do so in 2021.”

- a. Currently, has PG&E identified any specific areas within the HFTD for potential removal from PSPS scope?
- b. When will PG&E make a determination as to which areas within the HFTD should be removed from PSPS scope?
- c. What methods will PG&E use to determine which areas within the HFTD should be removed from PSPS scope?

**ANSWER 03**

- a. Though ongoing analysis and verification is underway, PG&E has tentatively identified some areas that may be removed from PSPS scope.
- b. PG&E is working towards determining whether it will, or will not, remove areas from PSPS scope by the onset of the 2021 PSPS season pending leadership review and approval. However, this work is still ongoing and the timelines are subject to change.
- c. PG&E will utilize the same methodology described in Sections 4.2 (starting on Page 51) and 4.4.2 (starting on Page 110) of the 2021 Wildfire Mitigation Plan for removing areas from PSPS scope as it does for adding areas into PSPS scope. Additionally, PG&E will perform field reviews to further assess and confirm the conditions on the ground for any area deemed safe for potential removal from PSPS scope.
