

Get the latest information on how PG&E is responding to historic storms this winter »

Northern and Central California Average Temperatures

ENERGY EFFICIENCY

Higher natural gas prices may drive up winter bills

Colder than normal temperatures, higher demand for natural gas and tighter supply are driving up gas prices on the West Coast this winter. We do not control market prices and do not markup gas and electricity purchased on behalf of our customers, but you will see higher heating bills if you're using more gas to heat your facility and water, or run your operations.

Here are no- and low-cost actions to help you lower energy use and manage winter bills.
