The following questions related to PG&E's 2021 Wildfire Mitigation Plan (WMP) Update.

QUESTION 09

At page 908 of your WMP, PG&E states that it will “develop a more granular, circuit level model, to assess PSPS customer impacts” in 2021.

- a. What PSPS customer impacts will this model include?
- b. What data sources is PG&E using to develop this model?

ANSWER 09

- a. PG&E's Future State of PSPS Consequence Model (identified in PG&E's Model Glossary in the 2021 WMP on page 970) will assess customer impacts by circuit, including the frequency, scope, customers and duration. Customer impacts included in this model will include the safety, reliability, and financial consequences using our MAVF framework.
- b. PG&E is using a mix of PG&E data from 2019 and 2020 actual PSPS de-energization events, as well as industry data from major storm events such as the 2003 Northeast Blackout and 2011 Southeast Blackout.
