

Lead System Operator Knowledge Assessment (LSOKA)

Preparation Guide

Lead System Operator Knowledge Assessment (LSOKA)

OVERVIEW

Pacific Gas and Electric Company believes it is critical that employees have the lead skills and abilities necessary to succeed in lead jobs across the company. The Lead System Operator Knowledge Assessment (LSOKA) allows PG&E to make an initial assessment of your skills and abilities as related to the Lead System Operator (LSO) job. Because the LSOKA is standardized, it ensures that everyone who wants to be considered for the LSO position receives a fair and objective opportunity. This test has been professionally validated to ensure job-relatedness. The LSOKA is a multiple choice test that contains questions assessing your knowledge in a wide range of subject matter related to technical knowledge, processes, procedures and standards.

The LSOKA is an online, proctored test that has 60 multiple choice questions measuring knowledge of technical processes, procedures and standards as related to the Lead System Operator job. Below is a list of the subject matter that will be covered on the test. Please prepare yourself by reviewing job-related materials that contain this information.

- A. Relays
- B. Equipment
- C. Print Reading and Schematics
- D. Standards and Procedures
- E. AFW Processes/Switch Writing
- F. On the Job Information Resources

DO YOUR BEST

We hope you find this information helpful. Make sure that when you are scheduled to take the test you are physically and mentally alert and ready to do your best, or you should reschedule your test session.
