FA. In-Line Inspection Balancing Account (ILIBA)

- 1. **PURPOSE:** The purpose of the In-Line Inspection Balancing Account (ILIBA) is to track the difference between the capital revenue requirement based on adopted capital expenditures for the Traditional In-Line Inspection (ILI) Upgrade program and the revenue requirement associated with actual capital expenditures for the authorized 48 Traditional ILI projects (12-project per year pace) on an aggregate basis over the 2019 Gas Transmission and Storage (GT&S) rate case cycle (2019-2022). The ILIBA is a one-way balancing account.

This account is comprised of a Main Account, which tracks amounts related to backbone transmission and/or storage activity that is recovered from all customers and a Local Transmission (LT) Subaccount, which tracks amounts related to local transmission activity that is recovered from all customers except Backbone Service-Level end-use customers who do not fund local transmission activities.

- 2. **APPLICABILITY:** The ILIBA will apply to all customer classes, except for those specifically excluded by the Commission.

- 3. **REVISION DATE:** If the actual capital expenditures (Main Account plus LT Subaccount) incurred are less than the 2019-2022 aggregated adopted capital expenditures at the end of the rate case cycle, PG&E will refund the revenue requirements associated with the unspent capital expenditures to customers. The balances in the Main Account and LT Subaccount will be trued up in rates. If the total actual capital expenditures incurred are equal to or greater than the 2019-2022 aggregated adopted capital expenditures at the end of the rate case cycle, the adopted revenue requirements recovered from customers will be reallocated between the Main Account and LT subaccount based on the ratio of actual capital expenditures related to the Main Account and the LT Subaccount to total actual capital expenditures. Disposition of the balances in this account will be trued up at the end of the GT&S rate case cycle. Funding returned to, or subsequently recovered from core customers will be through the Core Cost Subaccount of the Core Fixed Cost Account. Funding returned to, or subsequently recovered from noncore customers will be through the LT Subaccount of the Noncore Customer Class Charge Account (if associated with the LT Subaccount) or through the Noncore Subaccount of the NCA (if associated with the main account).

- 4. **RATES:** The ILIBA does not have a separate rate component.

5. **ACCOUNTING PROCEDURE:**

PG&E will maintain a sub ledger to track the capital expenditures incurred as recorded in its accounting system of record for the authorized 48 Traditional ILI projects (12-project per year pace). If the aggregated capital expenditures incurred at the end of the GT&S rate case cycle are less than the adopted amount, entries a. and b. will be recorded in the Main Account and LT Subaccount. If the aggregated capital expenditures incurred at the end of the GT&S rate case cycle are greater than the adopted amount but either the Main Account or LT Subaccount are underspent, then entries a. and c. will be recorded.
