

Business Customers

Know your rate plan options

We provide a range of electric and natural gas rate plans. Find the plan that works best for you based on your budget and energy needs.

Log in or register at [pge.com](https://www.pge.com) to:

- Get detailed information about your usage
- Compare your rate plan options

In addition to these online tools, you can call [1-800-468-4743](tel:1-800-468-4743) for help with a rate analysis.

Electric Rate Plan Options

For details and more information on all electric rate plan options, visit [pge.com/tariffs](https://www.pge.com/tariffs).

Time-of-Use

Time-of-Use rate plans can help you save money based on when your business uses energy. Prices are higher during peak hours and lower at all other times.

See chart at right for peak hours and to learn more, visit [pge.com/tou](https://www.pge.com/tou).

Business Low Use (B1) is for small businesses with low energy use, whose demand is less than 75 kW.

Business Low Use Alternative (B6) is for small businesses with low energy use whose demand is less than 75 kW and that have some flexibility to adjust their energy use throughout the day.

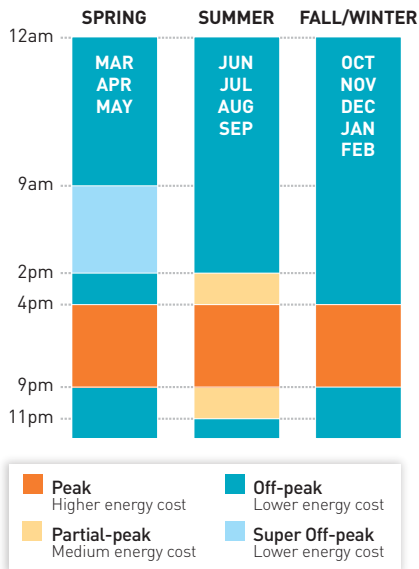

Business Medium Use (B10) is for medium businesses with moderate energy demand consistently under 500 kW and includes a Demand Charge per kW based on maximum load.

Business Medium-High Use (B19)* is a voluntary rate plan for large and medium businesses with moderate to high energy demand consistently under 500 kW. This rate features lower energy rates but a higher Demand Charge than the B10 Rate Plan.

Emergency Load Reduction Program (ELRP)

offers incentives (\$2/kWh) for voluntarily reducing energy consumption during times of high demand on the grid. No penalties are associated with participation.

[elrp.olvineinc.com](https://www.pge.com/olrp)

Peak Day Pricing

Peak Day Pricing combines a Time-of-Use rate with surcharges on 9 to 15 Event Days each year, plus credits on all summer usage. On Peak Day Pricing Event Days, hours are 4–9 p.m.

[pge.com/pdp](https://www.pge.com/pdp)

*Business Medium-High Use (B19) and Business High Use (B20) are mandatory for customers with energy use over 499 kW and over 999 kW, respectively.

California Alternate Rates for Energy (CARE)

program provides business customers a monthly discount on energy bills for qualified group living facilities.

[pge.com/CARE](https://www.pge.com/CARE)

Clean Energy Alternatives

Renewable Generation (e.g., Rooftop Solar)

enables you to install a generating system, interconnect to the PG&E grid and receive credits to offset the cost of your energy usage. With certain additional requirements, storage can also be installed to increase the value of your system.

The current renewable generation program (Net Energy Metering 2) will be closing April 14, 2023. If you submit an application after this date, you will be enrolled in the Solar Billing Plan.

[pge.com/savewithrenewables](https://www.pge.com/savewithrenewables)

Option R eligibility has expanded to include new rates and clean energy equipment and a new program cap has been established.

[pge.com/cappedrates](https://www.pge.com/cappedrates)

Option S is available for qualifying B19, B19V and B20 customers with storage that has rated capacity in watts of at least 10% of peak demand over the previous 12 months. Subject to program caps.

Business Electric Vehicle Rate (BEV)

provides more affordable charging for separately metered, commercial electrical vehicles.

B1 Storage Rate Option (B1-ST)

is available for small business customers with eligible storage capacity.

Note: Direct Access and Community Choice Aggregation customers are eligible for many, but not all, of the rate plans or features listed in this notice. To learn more, contact your provider.

Natural Gas Rate Plans

Your rate plan is determined by the level of service you need and the amount of gas used per month. For details and more information on all gas rates, visit [pge.com/tariffs](https://www.pge.com/tariffs).

Small Commercial (G-NR1) is for businesses with average monthly use less than 20,800 therms for the last 12 months in which gas use exceeded 200 therms.

Large Commercial (G-NR2) is for businesses with average monthly use greater than 20,800 therms for the last 12 months in which gas use exceeded 200 therms.

For both gas rates, you may choose who supplies your natural gas—PG&E or a third party gas supplier. We will continue to deliver gas to your business regardless of which supplier you choose. Both rates are also available to separately metered common areas in a multifamily complex.

For more information and to learn about noncore rate plans, such as **G-NT** and **G-EG**, where your gas must be supplied by a third party gas supplier, visit [pge.com/tariffs](https://www.pge.com/tariffs).

Rates for Natural Gas Vehicles

Refueling Stations for Natural Gas Vehicles (G-NGV1) applies to the sale of uncompressed natural gas for the sole purpose of compressing it for use as a motor vehicle fuel while **G-NGV2** provides compressed service at our stations open to the public.

G-NGV4 is for natural gas fueling stations that have elected noncore service and maintain an average monthly use greater than 20,800 therms for the last 12 months, through a single meter, excluding the months that do not exceed 200 therms.
