

**PACIFIC GAS AND ELECTRIC COMPANY
Wildfire Mitigation Plans Discovery 2022
Data Response**

PG&E Data Request No.:	CalAdvocates_031-Q06		
PG&E File Name:	WMP-Discovery2022_DR_CalAdvocates_031-Q06		
Request Date:	August 18, 2022	Requester DR No.:	CalAdvocates-PGE-2022WMP-31
Date Sent:	September 8, 2022	Requesting Party:	Public Advocates Office
PG&E Witness:		Requester:	Holly Wehrman

Please provide a separate GIS file for each composite risk score identified in question 2(a), which shows the risk score at the same granularity that it is currently used to inform wildfire mitigation measures (as discussed in question 2(f)).

QUESTION 06

These GIS files should contain, at a minimum, the following:

- a) Geometric features detailing the most granular level available for each risk score. This may be points, polygons, lines, or whichever geometry best suits the relevant features.
- b) The risk score associated with each feature from part (a).
- c) Circuit identification number associated with each feature from part (a).
- d) Circuit name associated with each feature from part (a).
- e) Unique identification for each geometric feature (e.g. circuit segment name, asset ID, etc.)

ANSWER 06

A GIS file containing the risk scores at the circuit segment level for the 5 composite risk models identified in the response to Question 02 are provided in WMP-Discovery2022_DR_CalAdvocates_031-Q03-Atch01_CONF.zip.
