

PG&E - Marketing & Communications | 2024 Innovation Summit Highlight

Our program is about to begin. Please take your seats.

You can't ask for an Innovation Summit to be in a better place than right here in Silicon Valley.

I think it's critically important as the capital of Silicon Valley, if we're going to lead our country forward, the only way to do that is through innovation.

Would you be open to breaking a little news here on the stage?

Let's do that.

Solving problems baked into your actual strategy is where AI lives, breathes, and transforms.

This whole AI journey we're on is going to be bigger than the internet. It's going to be more transformational than the mobile phone. We are living in a truly transformational time.

If you're going to deploy artificial intelligence at a nuclear power plant, you better make damn sure this thing works and it works reliably.

We cannot accept it's too hard. We cannot accept it can't be done. We cannot accept that let somebody else, let the next generation take care of that. We're going to take care of that.

NVIDIA, we don't build solutions for nuclear. We don't build solutions for the grid. We don't build solutions for energy, health care. We partner with companies that do.

I love this quote. "great is the one who plans the trees whose shade they may never know."

There's something special and important in creating the conditions for success for a tree to thrive. The same is true for innovation.

Partners like yourself will create the grid of the future for not just us here today, but for the generations to come and let that be our legacy.

San Jose is one of the most diverse and innovative cities on the planet. How do we continue to grow? How do we continue to create opportunity and be a city that is a model of what the American dream needs to look like going forward? And, Patti, I'll turn it back to you.

The problems to be solved are your future to be caused, and the why, you can get up every day knowing you're making the world a better place. Please come join us. We have a big job to do for really important reasons. And we're counting on you to help us do it. Let's do this. Thank you so much.
