<b>PG&amp;E Data Request No.:</b>	<b>SPD_022-Q001</b>
<b>PG&amp;E File Name:</b>	WMP-Discovery2023-2025_DR_SPD_022-Q001
<b>Request Date:</b>	September 18, 2024
<b>Requester DR No.:</b>	QDR request
<b>Requesting Party:</b>	Safety Policy Division
<b>Requester:</b>	Henry Sweat
<b>Date Sent:</b>	October 7, 2024

**QUESTION 001**

We looked at QDR metric 15.b from Q1 and Q2 (metric name – Level 2 Findings Fixed) to try to see if we could correlate the number of Level 2 findings fixed with the number of findings fixed reported by PG&E in the last meeting. We got ~55k compared to 69k reported in the last meeting. We wanted to double check why the numbers are not the same. I attached my spreadsheet so your team can see exactly what I did.

**ANSWER 001**

PG&E believes there may have been a misunderstanding regarding the Level 2 Findings discussed during the meeting on September 12, 2024.

During the September 12 meeting with SPD, PG&E reported the year-to-date Safety and Operational Metrics (SOM) as of June 2024 for Level 2 findings were 69% on time. PG&E did not report on the number of tags completed.

It is difficult to compare the SOM with the Quarterly Data Report (QDR). SOMs measure the timeliness of Tier 2 and Tier 3 HFTD Level 2 tags by their maximum allowable timeframes per GO 95 compared to QDR which reports on the total number of tags completed each quarter regardless of their compliance due dates. Furthermore, SOMs includes vegetation management tags whereas the QDR does not and the QDR also includes non-HFTD tags.

PG&E would be happy to further discuss or clarify this item at future meetings, if it would be helpful.
