

Multifamily Housing and Small Business EV Charger Program - Video Transcript

Our experience with PG&E's EV charging program has been great. They made the entire process easy, smooth, and seamless. There was no pressure involved. They provided me a deadline and a date, and they actually beat the dates that they provided to me. The project was certainly done on time. Offering EV service at our site makes me feel top tier. The best part about this program is knowing that it's very helpful to our environment. But in addition to that, it's helping out the residents to save more and ultimately be more cost effective when it comes to how they're utilizing their funds. This is definitely one service and program you should implement for your residents as well.
