

I'm not happy with the way that PG&E handled the wildfires.

Yeah.

Yeah.

Yeah, I totally, totally understand. We're adding a ton of sensors. As soon as something comes in contact with the powerline, it'll turn off so that there's not a risk that it's going to fall to the ground and start a fire.

Okay.

I want you to be able to feel the improvements. We've been able to reduce wildfire risk from our equipment by over 90%.

That's something I want to believe.
