

I guess what I'm looking for from you is, I mean, I know how the fire affected me and there's always a constant fear that who's to say something like that won't happen again?

That's fair. We committed to underground 10,000 miles of electric line. You look back at where we were 10 years ago, and we are in a completely different place today. And it's because of how we need to care for our communities and our customers.

I hope that's true.

That's my commitment.
