Public Utilities Commission of the State of California

**Subject: Tier 1 Information-Only Submittal – Status of Projects Funded through IIJA, IRA and CHIPS Quarterly Report for the Period Q3 2023 Pursuant to Resolution E-5254 Ordering Paragraph 5**

**Purpose**

In compliance with California Public Utilities Commission (Commission or CPUC) Resolution (Res.) E-5254, *Resolution to Adopt Procedural Mechanisms for Review and Approval of Electric and Gas Investor-Owned Utility Cost Recovery Requests for Infrastructure Investment and Jobs Act and Other Federal Grant Programs*, Pacific Gas and Electric Company (PG&E) submits this Tier 1 information-only advice letter pursuant to Ordering Paragraph 5 of the Resolution to provide quarterly reporting to Energy Division. The attached quarterly report contains information on the status of projects applied for or funded through the Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA), or Creating Helpful Incentives to Produce Semiconductors and Science Act (CHIPS).

**Background**

On April 10, 2023, the CPUC issued Res.E-5254 to:

- Describe the process by which the investor-owned utilities (IOUs) should seek to recover costs associated with matching funds and other costs associated with participation in the IIJA, the IRA and the CHIPS.
- Provide direction on how IOUs should track project costs and taxes associated with grants awarded under the IIJA, IRA, and CHIPS.
- Establish an advice letter process for IOUs to track and regularly report to Energy Division on planning, seeking, and implementation of IIJA, IRA, and CHIPS awards.

PG&E submits this information-only Tier 1 AL in compliance with OP 5 of Res.E-5254. The information appended to this Advice Letter is up to date as of October 31, 2023, with the best available information. Due to the varying nature of grant application processes

across opportunities, the scope and value of awards being pursued may change before applications are finalized.

# INTRODUCTION

Last Updated: 9/15/23

## Purpose

Order 5 of April 2023's Resolution E-5254 requires that, starting in Q3 of 2023, most California electric and gas IOUs submit quarterly information-only advice letters to Energy Division containing information on the status of projects applied for or funded through the Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act

Since the Commission issued Resolution E-5254, additional information on several grant opportunities has become available. Additionally, in May of 2023, Gov. Newsom issued executive order N-8-23, establishing an Infrastructure Strike Team and requiring additional collaboration among agencies across California in order to maximize the capture of federal funding. Both of these developments have given Energy Division a better idea of the types of projects that may be funded and the types of information that may be needed about these projects

Resolution E-5254 provided Energy Division with flexibility to update the requirements in Table 2 ("Table 2: Quarterly Advice Letter Requirements") when needed. In place of the requirements in Table 2 of E-5254, to fulfill the reporting requirement electric and gas IOUs should provide a populated copy of the "Template" tab of this workbook as part of the Advice Letter. Standardization of reporting information will better facilitate interagency collaboration and reporting required under N-8-23, reduce IOU and Energy Division workload, and provide the

Energy Division envisions the primary use of this data will be (1) as a search tool to locate projects and contacts for further discussion and (2) for high-level summary statistics. Accordingly, entries are formatted to be short

## How-to

The "Instructions" tab describes each field and provides formatting and other notes to IOUs on how each field should be populated in the "Template" tab. As guidance may be updated on a rolling basis, Energy Division will post the most recent blank version of this workbook on the CPUC's Federal Funding website, available here:

To populate the workbook, in the "Template" tab, for each project please create and populate a new column. The Column Header in Row A should be the Index Number for the project (the same information contained in Row 1). The "Field Number" and "Bin" columns are provided to help organize the data, please do not alter the information in these columns. To preserve the drop-down options when new columns are needed, please right

If your data needs special handling, please start the cell with double asterisks (\*\*). For example, if in the "Renewable Location" field, solar generation on your project is located mostly but not completely in front of the meter, choose the: \*\*Other in the template sheet drop-down option for that cell and create a note in the "Data

The Governor's Office of Business and Economic Development (GO-Biz) is developing a public-facing dashboard of federally funded projects, as required under N-8-23. CPUC will pass certain information to GO-Biz to populate the dashboard for energy-related projects. Fields that contain information that will be passed to GO-Biz and may be made public are indicated in the "For Public Dashboard" column (Other fields may also be passed into the dashboard if requested by GO-Biz). IOUs should not include any confidential information in responses to these

Energy Division recognizes that many opportunities are competitive. Energy Division will not share information on opportunities that are indicated as pre-submission in the "Award Status" field. Energy Division does not believe that, once submitted, any information collected in this tracker must be treated as confidential. If an IOU would like to request confidential treatment of any information submitted in the template, that request should

### **Reporting Date**

Resolution E-5254 is vague on the due date for the information-only advice letters, only specifying "Starting in Q3 of 2023...". To maintain reporting consistency across electric and gas IOUs, start reporting with the quarter that closes September 2023. To provide time to assemble, review, and submit the advice letter, advice letters

#### **Due Dates:**

Q1: April 30

Q2: July 31

Q3: October 31

## California Tribal Energy Resiliency Alliance (C-TERA)

<b>Tribe:</b> Blue Lake Rancheria <b>CAM:</b> Taner Kural <b>IOU:</b> PG&E <b>CCA:</b> RCEA <b>Primary Project Developer:</b> Schatz Energy Research Center			
<b>Project Description</b>	The Blue Lake Rancheria Tribe’s microgrids currently provide critical services to the community during grid outages resulting from PSPS events, earthquakes, and severe storms. As the existing microgrid was an early implementation, this project aims to enhance the system to demonstrate the next generation of microgrid design. The BLR Microgrid 2.0 will expand BLR's initial pilot-scale BTM microgrids to full scale and will include upgrades to the BLR microgrid systems, increased onsite solar generation and battery storage, and improved cybersecure and automated controls systems. The Microgrid 2.0 will construct nested microgrids to serve new Tribal facilities, explore demand response, resource adequacy, and export grid resilience services and economics, and expand the microgrid’s coverage to support additional buildings. The project will also electrify HVAC and water heating systems by installing electric heat pumps and water heaters. The BLR microgrid will also act as a test bed for validating the breakthrough Hoopa 1101 circuit nested microgrid portfolio serving multiple Tribes.

<b>Tribe:</b> Hoopa Valley <b>CAM:</b> Tanner Kural <b>IOU:</b> PG&E <b>CCA:</b> RCEA			
<b>Primary Project Developer:</b> Schatz Energy Research Center			
<b>Project Description</b>	The Hoopa Valley and neighboring Tribes' electricity is dependent on an unreliable Hoopa 1101 circuit that passes through a heavily forested region prone to extreme weather conditions and PSPS events. The Hoopa Valley Community Microgrid will provide seamless, clean backup power for the Hoopa 1101 circuit (from Hoopa to Wautec and to Somes Bar) and be located near the existing Hoopa substation. The generation from this microgrid will not only support Hoopa Valley Tribal community but also the downstream Tribal communities. Generation includes solar PV sited near critical facilities (6 MW) and a small hydroelectric project (475 kW) which has been informed by a scoping study funded by the DOE Tribal Energy Program. Associated equipment for the system includes a 7.8 MW, 4-hour battery energy storage system and a 1 MW Tier 4 diesel generator (deep backup). The project will greatly improve electricity reliability and critical service operations for the Hoopa Valley Tribe and their neighbors and provide a multitude of critical grid services.

<b>Tribe:</b> Karuk Tribe <b>CAM:</b> Tanner Kural <b>IOU:</b> PG&E <b>CCA:</b> RCEA			
<b>Primary Project Developer:</b> Schatz Energy Research Center			
<b>Project Description</b>	The Karuk Tribal Community is the furthest downstream of the three Tribal communities served by the Hoopa 1101 circuit, one of the most unreliable feeders in the state. The project will install a community microgrid with batteries to support resilience for Orleans, with a core zone in central Orleans supporting a range of critical facilities, including Fire, Fire Training, Fueling Station, Post Office, Health Clinic, School, Water Supply, and more. Service would be extended to Somes Bar if there are no faults (e.g., trees contacting) on the lines extending beyond the north edge of Orleans. The project will improve the resilience and reliability of power for the whole community, addressing many of the critical issues facing people in the region. The Project will be located at the furthest grid edge of the innovative three nested microgrids that will balance each other.

<b>Tribe:</b> Yurok <b>CAM:</b> Tanner Kural <b>IOU:</b> PG&E <b>CCA:</b> RCEA <b>Primary Project Developer:</b> Schatz Energy Research Center			
<b>Project Description</b>	<p>The Yurok Tribal Reservation is the middle of three Tribes that are downstream of the unreliable Hoopa 1101 circuit that is commonly impacted by power disruptions. The Tribe will develop a Yurok-owned, operated, and maintained community-scale microgrid to service the Upper Yurok Reservation. The project will extend power to many unelectrified homes in the Upper Reservation, dramatically increase system resiliency and tribal energy sovereignty, re-localize the power economy and Tribal planning priorities, and place localized infrastructure in the care of Yurok Tribal Members. The Yurok Tribe also has goals to develop its own Tribal Utility and self-manage its electricity infrastructure. The proposed 1.5 MW hydropower generation was scoped under the Yurok Wind and Hydro Feasibility Study conducted by Schatz Energy Research Center in close collaboration with the Yurok Tribe, supported by funding under the DOE Tribal Energy Program. The hydropower system would provide clean energy to support the microgrid without requiring additional diesel generation for deep backup. The Yurok Tribal Community Microgrid would be one of the three innovative nested microgrids that will be orchestrated to balance each other's loads.</p>

<b>Tribe:</b> Middletown Rancheria <b>CAM:</b> Tanner Kural <b>IOU:</b> PG&E <b>CCA:</b> MCE<100mi <b>Primary Project Developer:</b> McGinnis and Associates			
<b>Project Description</b>	The Middletown Rancheria receives unreliable electricity delivery and power outages due to the wildfires and floods in the region. The community shelters house evacuees during wildfires and coordinates with CalFire during disaster response. The Tribe has existing diesel generators to use as power supply during emergencies. This project would deploy a 1MW BTM microgrid and reduce the Tribe’s reliance on fossil fuels during outages. The microgrid will include infrastructure for V2G charging and take part in wholesale energy markets during normal operation.

<b>Tribe:</b> Paskenta <b>CAM:</b> Elise Ersoy <b>IOU:</b> PG&E <b>Primary Project Developer:</b> Woven			
<b>Project Description</b>	This project aims to install a community microgrid (PV/BESS) on Paskenta Reservation, in a rural area impacted by wildfire, extreme weather, and power shutoffs. The microgrid will provide grid services within the CAISO ancillary services market during normal operating conditions.

<b>Tribe:</b> Robinson Rancheria				<b>CAM:</b> Tanner Kural		<b>IOU:</b> PG&E		<b>CCA:</b>	
<b>Primary Project Developer:</b> GHD, Schatz Energy Research Center									
<b>Project Description</b>			<p>The Robinson Rancheria is highly susceptible to outages due to fires, high wind events, and storm events. The region also experiences high levels of congestion at the distribution level. The proposed front-of-the-meter microgrid will include development of commercial 3.5 MW combined ground-mounted solar PV and carport solar PV arrays, 4MW/16MWh Battery Energy Storage System, and 12 vehicle EV charging hub. The project will provide energy resiliency for the Tribe and broader grid services such as resource adequacy, ancillary services, and additional capacity. A community microgrid has been a long-term goal for the Tribe to achieve energy sovereignty. It is expected that the Project will provide opportunities for the Tribe to serve in a leadership role for sustainability and provide emergency response facilities to the greater region, which is situated along a major corridor (State Hwy 20) between I-5 and Hwy 101.</p>

<b>Tribe:</b> Tejon <b>CAM:</b> Qing Tian <b>IOU:</b> Pacific Gas & Electric (PG&E) <b>Primary Project Developer:</b> Sovereign Resiliency Partners			
<b>Project Description</b>	The Green Tejon Community Partnership (GTCP) Community Microgrid will focus on southeastern Kern County, California, a rural area that is severely socioeconomically disadvantaged and has poor air quality. The 10-acre GTCP project will be installed on Tejon Tribal Community Center land and will include 1.5MW of solar PV, 3.5MWh of battery energy storage systems, and multiple electric vehicle charging stations. The GTCP project will provide electric and thermal resilience by utilizing four governmental buildings as community shelters during emergencies, as certified shelter and food distribution centers do not exist in the area. Additionally, the Tribe plans to build a gas station on the land and the microgrid will support the gas station and provide transportation resilience during grid outages.
